

DEVELOP A PYTHON SCRIPT

Team ID	PNT2022TMID50154
Project Name	Personal Assistant for senior people who are self-reliant

SCRIPT:

```
a=int(input())
;b=int(input()) c=a+b
print ("The sum is",
c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print ("The sum is", c)
```

The script has been executed, and the output is visible in the Run console at the bottom. The console shows the command executed: `C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py`. The output of the script is:

```
4
8
The sum is 12
Process finished with exit code 0
```
